PROFESSIONAL SUMMARY

Full Stack Software Engineer with 5+ years of experience designing and delivering scalable, high-performance web applications using React, Next.js, TypeScript, Node.js, and Express.js. Strong grounding in object-oriented programming (encapsulation, abstraction, inheritance, polymorphism) and system design for both frontend and backend: rendering strategies (SSR/SSG/ISR/PPR), state and caching boundaries, design systems, REST API design, multi-tenancy, queues, and horizontal scalability. Security-minded by default (JWT/OAuth, RBAC, OWASP Top 10, data sanitization and validation, secrets management). Hands-on with the full delivery path: Docker containerization, GitHub Actions CI/CD pipelines, and AWS (EC2, RDS, S3, IAM) on Linux servers. Uses AI tools to automate repetitive and manual work (scaffolding, boilerplate, test generation, refactoring, docs, code review assistance) to ship faster while keeping human review on architecture, security, and quality. Mentors junior developers and writes clean, secure, scalable, maintainable code.

TECHNICAL SKILLS

Frontend: React, Next.js (SSR/SSG/ISR/PPR, API Routes), React Router v7, TanStack Router, TypeScript, JavaScript (ES6+), HTML5, Tailwind CSS, Tailwind Variants, SCSS, Storybook

State Management: Redux Toolkit, Redux Thunk, Zustand, TanStack Query, React Context

Backend & APIs: Node.js, Express.js, Next.js API Routes, Server Actions, RESTful APIs, Swagger/OpenAPI, Redis, BullMQ, Socket.io

Databases & ORM: PostgreSQL, MS SQL, MongoDB, Supabase, Prisma ORM, Mongoose, query optimization, indexing

OOP & Design: OOP principles (encapsulation, abstraction, inheritance, polymorphism), Clean Architecture, layered and modular architecture, dependency injection, separation of concerns, DRY

System Design: Frontend: component-driven architecture, design systems, rendering strategy selection, code splitting, caching and state boundaries, Core Web Vitals, accessibility. Backend: REST API design, multi-tenant data isolation, async processing with queues, Redis caching, pagination, rate limiting, horizontal scaling

Security: JWT, OAuth, NextAuth, RBAC, ZenStack access policies, OWASP Top 10 (XSS, CSRF, SQL injection, broken access control), input validation, data sanitization (output encoding, query parameterization, schema validation), CORS, secure headers, password hashing, secrets management, dependency auditing

CI/CD & Containers: GitHub Actions pipelines (lint, test, build, image publish, deploy), Docker containerization to build images, Docker Hub, environment-based secrets, zero-manual-step deployments, Husky pre-commit hooks

Cloud & Linux: AWS EC2, RDS, S3, IAM; Linux (Ubuntu) server administration; Netlify; Render; Vercel

AI-Assisted Dev: AI coding assistants (Claude, GitHub Copilot, ChatGPT, DeepSeek) for scaffolding, boilerplate, refactoring, unit/E2E test generation, documentation, debugging, and code review; prompt engineering; automating repetitive and manual tasks; validating AI output through review, tests, and security checks

Testing & Tooling: Playwright, Git, GitHub, Vite, Webpack, ESLint, Husky

UI Libraries: Material UI, Kendo React, Ant Design, Radix UI, Shadcn, Styled Components

Other: Figma (basic), Elasticsearch, Agile/Scrum, Code Reviews, Mentoring, Accessibility, SEO

SOFT SKILLS

Problem Solving & Critical Thinking, Communication & Collaboration, Accountability & Ownership, Adaptability & Continuous Learning, Attention to Detail, Time Management & Prioritization, Creativity & Innovation, Fast Learner

PROFESSIONAL EXPERIENCE

React / Next Developer | RaraLabs

Feb 2026 – Present

- Working as a React specialist on a fintech platform, building and integrating TanStack React Router for type-safe, performant client-side routing across multiple applications.
- Integrated RESTful APIs with TanStack React Router loaders and actions, streamlining data fetching, caching, and route-level error handling.
- Architected an in-house design system on Radix UI primitives, styled with Tailwind CSS and Tailwind Variants.

- Drove performance optimization (code splitting, lazy loading, memoization, and render-path profiling) to improve load times and Core Web Vitals.
- Built responsive, type-safe components in TypeScript across desktop, tablet, and mobile.
- Working on the Fintech Rapid API Banking System, developing dashboards for real-time transaction tracking, payment status monitoring, and data visualization for banking and fintech clients, with security-conscious handling of financial data on the client.
- Use AI assistants to speed up component scaffolding, TypeScript typing, test generation, and refactoring, then review every change for correctness, accessibility, and security before merging.

Full-Stack Developer | 3ptrades Pvt. Ltd. / xRDigital Inc.

Jan 2024 – Feb 2026

- Designed, built, and maintained performant web applications using React, Next.js (SSR/SSG), and TypeScript with scalable, maintainable codebases.
- Drove frontend and backend architectural decisions: modular, reusable components (Kendo React, SCSS), layered service structure, and clear separation between UI, data access, and business logic.
- Developed REST APIs using Next.js API routes, Server Actions, and ZenStack, enforcing access policies and authorization at the data layer.
- Built backend services with Node.js and Express.js for an AI-agentic gym/fitness booking web app, where AI agents handle bookings, notifications, and third-party reservation confirmations, including queue-based automated follow-ups and email confirmations.
- Integrated RESTful APIs with Axios and Fetch API with robust error handling; used TanStack Query to fetch, cache, and synchronize server data; integrated NextAuth for authentication and authorization.
- Improved application speed through lazy loading, code splitting, and memoization, resolving performance bottlenecks proactively.
- Leveraged AI tools to automate repetitive and manual tasks (boilerplate generation, CRUD scaffolding, test drafting, documentation, code review assistance), shortening delivery cycles while keeping quality gates in place.
- Conducted code reviews and mentored junior developers on best practices, clean code, and secure coding standards.

React Developer | Podamibe Nepal Pvt. Ltd.

Jun 2022 – Nov 2023

- Developed modern dashboards and enterprise applications with React, Axios, Redux Toolkit, RTK Query, and MUI.
- Delivered pixel-perfect, accessible UIs from Figma designs, maintaining consistent design systems with SCSS and Styled Components.
- Optimized performance through predictable asynchronous workflows and efficient state management.
- Collaborated with cross-functional teams to implement scalable solutions in Agile sprints.

React Developer | Quantum IT Solutions

Dec 2020 – Apr 2022

- Built single-page applications following component-based architecture in React and JavaScript (ES6+).
- Designed responsive, interactive UIs using SCSS, Bootstrap, and Styled Components, enhancing UX and accessibility.
- Developed frontend interfaces for e-commerce and e-learning platforms, integrating with RESTful APIs.

.NET Developer | NBIT Pvt. Ltd.

Feb 2019 – Jan 2020

- Developed data-driven web apps using ASP.NET Core MVC, Entity Framework, and C#, applying OOP and MVC patterns, with responsive layouts in Bootstrap and jQuery.
- Wrote optimized SQL queries and integrated Entity Framework for efficient backend operations.
- Collaborated in Agile teams to deliver high-quality software on schedule.

HIGHLIGHTED PROJECTS

Multi-Tenant Real Estate SaaS Application (PERN) | *Next.js, React, TypeScript, Shadcn, Tailwind CSS, Node.js, Express.js, Prisma ORM v7, PostgreSQL, JWT, Nodemailer, AWS EC2, RDS, S3, IAM, Linux, Docker, Docker Hub, GitHub Actions* | [Live Site](#) | [API](#)

- Designed and built a multi-tenant SaaS platform with a layered Node.js/Express/TypeScript backend, Prisma ORM v7, and PostgreSQL for scalable, tenant-isolated data management.
- Implemented JWT authentication and role-based authorization, input validation and data sanitization, and Nodemailer-based transactional emails across tenant workflows; documented all endpoints with Swagger.
- Built the frontend with Next.js, React, TypeScript, Shadcn, and Tailwind CSS: a responsive, accessible UI for property listings and tenant dashboards.
- Containerized the backend with Docker and automated delivery with a GitHub Actions CI/CD pipeline: on every push it builds the image, pushes to Docker Hub, then connects to EC2 to pull the latest image and restart the container, with credentials held in GitHub Secrets for zero-manual-step deployments.

- Deployed on a Linux (Ubuntu) AWS EC2 instance with AWS RDS for production PostgreSQL, S3 for property images/files, and IAM roles and policies for least-privilege access; frontend on Netlify.

Materiel Insights – PLM Dashboard | *React, Next.js, Kendo React, SCSS, Prisma ORM, PostgreSQL*

- Architected reusable components and customizable dashboards for an aircraft management SaaS platform, enabling end-to-end tracking of aircraft lifecycle, PLM, BOMs, maintenance schedules, and parts inventory.
- Implemented ZenStack, Prisma ORM, PostgreSQL, Next.js API routes, Server Actions, and TanStack Query for performant data management.
- Improved scalability by optimizing queries and applying advanced memoization techniques.

Rapid API Banking Platform | *TanStack Router, Radix UI, TypeScript, REST APIs*

- Built an API banking solution with TanStack React Router, Radix UI, and TypeScript, integrating RESTful APIs to power banking services.
- Developed a reusable component library to accelerate feature development and keep UI consistent; implemented responsive, accessible layouts.

Smart Gateway – Payment Platform | *React, TypeScript, Material UI, Redux, Redux Saga*

- Built a unified payment gateway aggregating multiple providers (eSewa, Khalti, Connect IPS, bank/card payments) behind a single API, so merchants integrate once and offer all payment options.
- Developed a merchant admin portal tracking payment status, available options, and transaction responses in real time, with Recharts data visualization and secure payment-processing API integrations.

Piiink Platform – Business Community Tool | *React, Redux Saga, Material UI*

- Built a rewards and community platform connecting customers with nearby merchants, letting purchases support a chosen charity or club ("I Save, I Share, I Care").
- Created responsive, role-based dashboards with efficient state flow using Redux Toolkit + Saga.

Ebidhya – E-Learning Platform | *React, Ant Design, SCSS, REST APIs*

- Designed student/admin interfaces with mobile-first responsiveness; implemented secure JWT token-based authentication with Axios API consumption.

Real-Time Chat Application | *MERN Stack, Socket.io*

- Built a real-time chat app enabling instant bidirectional messaging, with live events for message delivery and online/offline user status over WebSockets.

Blog CMS API | *Node.js, Express.js, MongoDB, JWT, Swagger, GitHub Actions CI/CD* | blog-cms-hn17.onrender.com

- Built a blog content management API with JWT authentication and authorization; documented all endpoints with Swagger; integrated Multer and Cloudinary for images, PDFs, and videos.
- Set up a GitHub Actions CI/CD pipeline to automate testing and deployment to Render.

EDUCATION

Bachelor of Science in Computer Science and Information Technology (BSc CSIT)

2014 – 2018

Tribhuvan University, Institute of Science and Technology (IOST) | Final Score: 60.26%
