PROFESSIONAL SUMMARY

Full Stack Software Engineer with 5+ years of experience designing and delivering scalable, high-performance web applications using React, Next.js, TypeScript, Node.js, and Express.js. Specialized in frontend architecture, SSR/SSG/ISR/PPR, and modern state management, with strong backend experience building REST APIs with Prisma ORM and PostgreSQL. Hands-on with cloud and DevOps: deploying and managing AWS infrastructure (EC2, RDS, S3, IAM) on Linux servers and automating delivery with Docker and GitHub Actions CI/CD. Skilled in performance optimization, accessible UI/UX implementation, code quality, and mentoring junior developers. Fast learner, adaptable, and focused on writing clean, secure, scalable, and maintainable code following best practices and clean code architecture.

TECHNICAL SKILLS

Frontend: React, Next.js (SSR/SSG/ISR/PPR, API Routes), React Router v7, TanStack Router, TypeScript, JavaScript (ES6+), HTML5, Tailwind CSS, Tailwind Variants, SCSS, Storybook

State Management: Redux Toolkit, Redux Thunk, Zustand, TanStack Query, React Context

Backend & APIs: Node.js, Express.js, Next.js API Routes, Server Actions, RESTful APIs, Swagger, Redis, BullMQ, Socket.io

Databases & ORM: PostgreSQL, MySQL, MS SQL, MongoDB, Supabase, Prisma ORM, Mongoose

Cloud & DevOps: AWS EC2, AWS RDS, AWS S3, AWS IAM, Linux (Ubuntu) server administration, Docker, Docker Hub, GitHub Actions CI/CD

Auth: NextAuth, JWT, OAuth, ZenStack Access Policies

Testing & Tooling: Playwright, Git, GitHub, Vite, Webpack, ESLint, Husky

UI Libraries: Material UI, Kendo React, Ant Design, Radix UI, Shadcn, Styled Components

Other: Figma (basic), Elasticsearch, Agile/Scrum, Code Reviews, Mentoring, Accessibility, SEO, Core Web Vitals

SOFT SKILLS

- Problem Solving & Critical Thinking
- Communication & Collaboration
- Accountability & Ownership
- Adaptability & Continuous Learning
- Attention to Detail
- Time Management & Prioritization
- Creativity & Innovation
- Adaptable, fast learner
- Clean, secure, scalable & maintainable code with best practices and clean code architecture

PROFESSIONAL EXPERIENCE

React | Next Developer | RaraLabs

Feb 2026 – Present

- Working as a React specialist on a fintech platform, building and integrating TanStack React Router for type-safe, performant client-side routing across multiple applications.
- Integrated RESTful APIs with TanStack React Router loaders and actions, streamlining data fetching, caching, and route-level error handling.
- Designed and built reusable, accessible UI components, architecting an in-house design system on top of Radix UI primitives, styled with Tailwind CSS and Tailwind Variants for consistency and scalability across products.
- Drove performance optimization initiatives — code splitting, lazy loading, memoization, and render-path profiling — to improve load times and Core Web Vitals.
- Built fully responsive, type-safe components using TypeScript, ensuring consistent functionality and layout across desktop, tablet, and mobile devices.
- Working on the Fintech Rapid API Banking System, developing multiple dashboards for real-time transaction tracking, payment status monitoring, and data visualization for banking and fintech clients.

Full-Stack Developer | 3ptrades Pvt. Ltd. / xRDigital Inc.

Jan 2024 – Feb 2026

- Designed, built, and maintained performant web applications using React, Next.js (SSR/SSG), and TypeScript, ensuring scalable and maintainable codebases.

- Drove frontend architectural decisions, promoting modular and reusable component design with Kendo React and SCSS.
- Developed REST APIs using Next.js API routes, Server Actions, and ZenStack.
- Worked on the backend of an AI-agentic gym/fitness booking web app using Node.js and Express.js, building services where AI agents handle bookings, notifications, and third-party reservation confirmations.
- Built backend services with Node.js and Express.js, including automated booking follow-ups via queues and email confirmation integration.
- Integrated RESTful APIs with Axios and Fetch API, implementing robust error handling and optimized data-fetching workflows.
- Used TanStack Query to fetch, cache, and synchronize server data; integrated NextAuth for authentication and authorization.
- Improved application speed through lazy loading, code splitting, and memoization, proactively resolving performance bottlenecks.
- Conducted code reviews and mentored junior developers on best practices and clean code standards.

React Developer | Podamibe Nepal Pvt. Ltd.

Jun 2022 – Nov 2023

- Developed modern dashboards and enterprise applications with React, Axios, Redux Toolkit, RTK Query, and MUI.
- Delivered pixel-perfect, accessible UIs based on Figma designs, maintaining consistent design systems with SCSS and Styled Components.
- Optimized app performance through predictable asynchronous workflows and efficient state management.
- Collaborated with cross-functional teams to implement scalable solutions in Agile sprints.

React Developer | Quantum IT Solutions

Dec 2020 – Apr 2022

- Built single-page applications following component-based architecture in React and JavaScript (ES6+).
- Designed responsive, interactive UIs using SCSS, Bootstrap, and Styled Components, enhancing UX and accessibility.
- Developed frontend interfaces for e-commerce and e-learning platforms, integrating with RESTful APIs.

.NET Developer | NBIT Pvt. Ltd.

Feb 2019 – Jan 2020

- Developed data-driven web apps using ASP.NET Core MVC, Entity Framework, and C#, with responsive layouts in Bootstrap and jQuery.
- Wrote optimized SQL queries and integrated Entity Framework for efficient backend operations.
- Collaborated in Agile teams to deliver high-quality software solutions on schedule.

HIGHLIGHTED PROJECTS

Material Insights – PLM Dashboard — *React, Next.js, Kendo React, SCSS, Prisma ORM, PostgreSQL*

- Architected and developed reusable components and customizable dashboards for an aircraft management SaaS platform for the aviation industry, enabling end-to-end tracking of aircraft lifecycle, PLM, BOMs (Bill of Materials), maintenance schedules, and parts inventory.
- Implemented ZenStack, Prisma ORM, PostgreSQL, Next.js API routes, Server Actions, and TanStack Query for performant data management.
- Improved application scalability by optimizing queries and leveraging advanced memoization techniques.

Piink Platform – Business Community Tool — *React, Redux Saga, Material UI*

- Built a rewards and community platform connecting customers with nearby merchants, enabling purchases to support a chosen charity or club under an “I Save, I Share, I Care” win-win business model.
- Created responsive, role-based dashboards with efficient state flow using Redux Toolkit + Saga.
- Enhanced user experience with pixel-perfect design implementations.

Smart Gateway – Payment Platform — *React, TypeScript, Material UI, Redux, Redux Saga*

- Built a unified payment gateway aggregating multiple providers (eSewa, Khalti, Connect IPS, bank/card payments) behind a single API, letting merchants integrate once and offer all payment options to their customers.
- Developed a merchant admin portal to track payment status, available payment options, and transaction responses across all integrated providers in real time.
- Developed admin dashboards with data visualization components using Recharts.
- Integrated RESTful APIs for secure payment processing workflows.

Ebidhya – E-Learning Platform — *React, Ant Design, SCSS, REST APIs*

- Designed intuitive student/admin interfaces with mobile-first responsiveness.
- Implemented secure token-based authentication (JWT) with Axios API consumption.

Rapid API Banking Platform — *TanStack Router, Radix UI, TypeScript, REST APIs*

- Built an API banking solution using TanStack React Router, Radix UI, and TypeScript, integrating RESTful APIs to power banking services.
- Developed a highly reusable component library to accelerate feature development and maintain UI consistency across the platform.
- Implemented responsive, accessible layouts ensuring seamless experience across devices.

Real-Time Chat Application — *MERN Stack, Socket.io*

- Built a real-time chat application using the MERN stack and Socket.io, enabling instant bidirectional messaging between users.
- Implemented real-time events for message delivery, online/offline user status, and live updates using WebSocket connections.

Multi-Tenant Real Estate SaaS Application (PERN) — *Frontend: Next.js, React, TypeScript, Shadcn, Tailwind CSS, JWT Auth | Backend: Node.js, Express.js, TypeScript, Prisma ORM v7, PostgreSQL, JWT, Nodemailer | DevOps: AWS EC2, RDS, S3, IAM, Linux, Docker, Docker Hub, GitHub Actions* [Live Site](#) | [API](#)

- Built a multi-tenant real estate SaaS platform with a Node.js, Express.js, and TypeScript backend, using Prisma ORM v7 and PostgreSQL for scalable, tenant-isolated data management.
- Documented all backend endpoints with Swagger for clear, testable API specifications.
- Implemented JWT-based authentication and authorization, and integrated Nodemailer for transactional and notification emails across tenant workflows.
- Developed the frontend with Next.js, React, TypeScript, Shadcn, and Tailwind CSS, delivering a modern, responsive, and accessible UI for property listings and tenant dashboards.
- Automated backend delivery with a GitHub Actions CI/CD pipeline: on every push, the workflow builds a Docker image, pushes it to Docker Hub, then connects to the EC2 instance to pull the latest image and restart the container — enabling zero-manual-step deployments.
- Deployed and managed the backend on a Linux (Ubuntu) AWS EC2 instance, provisioned AWS RDS for the production PostgreSQL database, used AWS S3 for property image/file storage, and secured access with AWS IAM roles and policies; frontend deployed on Netlify.

Blog CMS API — *Node.js, Express.js, MongoDB, JWT, Swagger, GitHub Actions CI/CD* blog-cms-hn17.onrender.com

- Built a blog content management API using Node.js, Express.js, and MongoDB, with JWT-based authentication and authorization.
- Documented all endpoints with Swagger for clear, testable API specifications.
- Integrated Multer and Cloudinary for uploading and managing images, PDFs, and videos.
- Set up CI/CD pipeline using GitHub Actions to automate testing and deployment to Render.

EDUCATION

Bachelor of Science in Computer Science and Information Technology (BSc CSIT)

Tribhuvan University, Institute of Science and Technology (IOST)

2014 – 2018

Final Score: 60.26%
